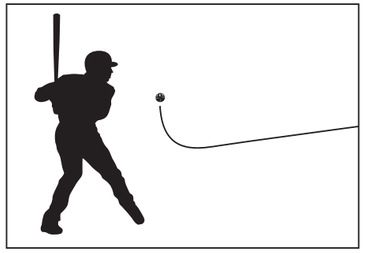
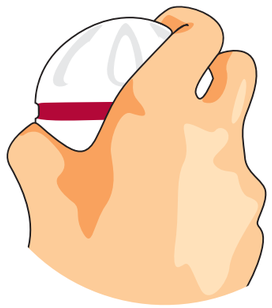
how to throw a **RISER**

PLACE the index finger on the outside of the SOLID half of the baseball. Apply firm pressure to the ball. The open side of the ball is facing down.

Throw with the open side of the wrist facing the target and release the ball off the finger tip in a spinning motion. Rotate right. Do the opposite for a left handed pitcher.

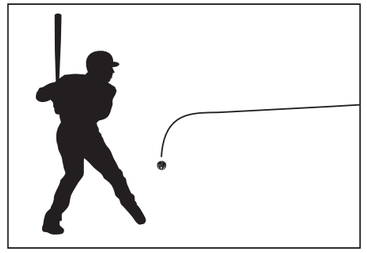


how to throw a **SINKER**

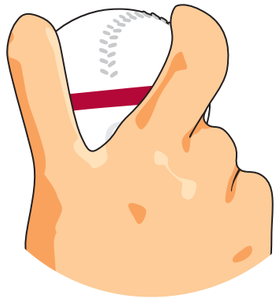


PLACE the index finger on the outside of the OPEN half of the baseball. Apply firm pressure to the ball. The open side of the ball is facing up.

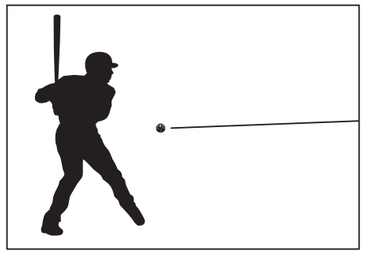
Throw with the open side of the wrist facing the target and release the ball off the finger tip in a spinning motion. Rotate right. Do the opposite for a left handed pitch.



how to throw a **FAST BALL**



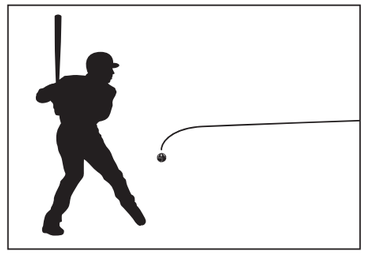
HOLD the baseball so that the index and middle fingers are on the SOLID half of the baseball. Line the index finger up with the seam of the ball. The thumb should be placed on the OPEN half. Grip the ball gently. Notice that there should be space between the ball and the palm of your hand. The soft grip on the baseball will allow the ball to leave the hand quicker for a faster pitch. The rotation on the ball should spin back toward the pitcher.



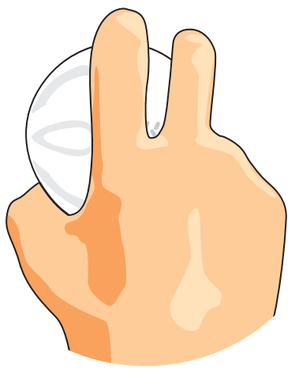
how to throw a **SLURVE BALL**

PLACE the index finger on the center rubber seam of the ball and the middle finger on the OPEN half of the baseball. The thumb is placed on the closed side of the baseball. Keep space between the baseball and the palm.

During the pitch the thumb rotates upward while the middle and index fingers rotate down. This will spin the ball in the right direction and the ball will move left.

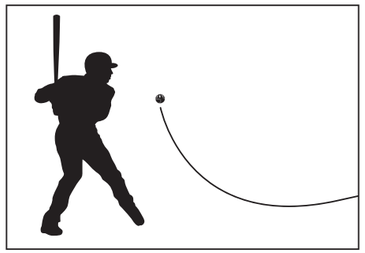


how to throw a **SCREW BALL**



PLACE the index finger on the center rubber seam of the baseball. The thumb is placed on the edge of the OPEN half of the baseball. Keep space between the baseball and the palm.

During the pitch the thumb rotates downward while the middle and index fingers rotates up and to the left. The ball will go up and to the right.



how to throw a **KNUCKLE BALL**

PLACE the index finger and the middle finger on the center rubber seam of the ball. The OPEN half of the ball faces the batter. Keep space between the baseball and the palm.

During the pitch throw the ball with NO spin on the release. The ball should travel without any rotation. This will create a very random style pitch.
