Assembly Instructions:

STEP 1

Remove all of the components from the box and confirm you have all the parts from the parts list.

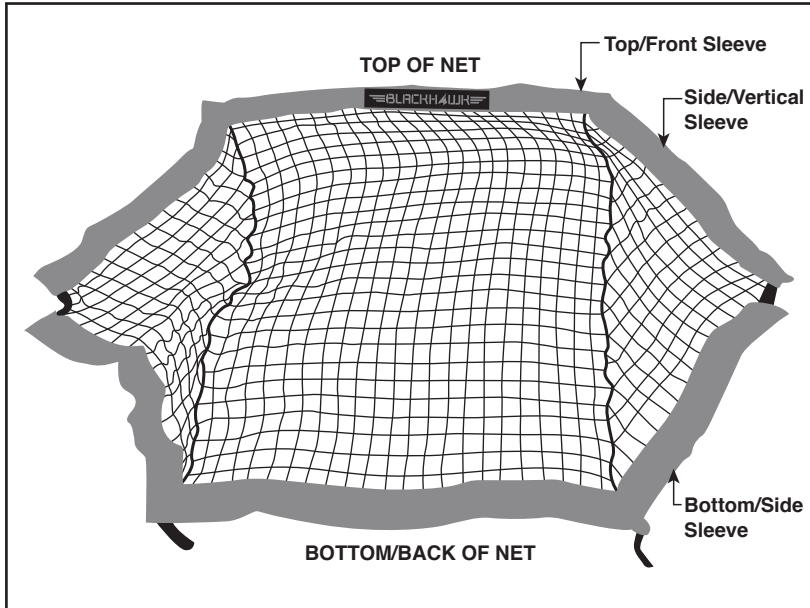

STEP 2

Unfold the fiberglass poles and slide pieces together at the joints.

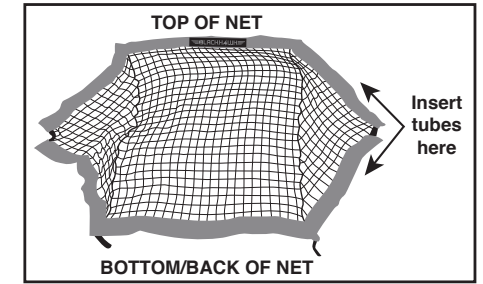

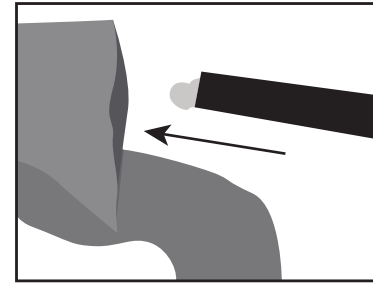

STEP 3

Lay out the net and find the optic yellow nylon sleeve section with the Blackhawk logo. This is the Top/Front of the net.

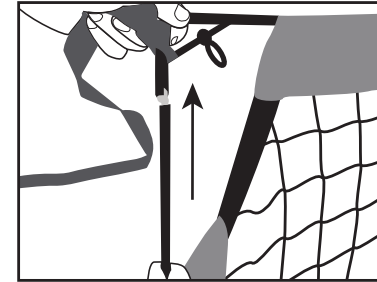

STEP 4

Insert both sets of fiberglass tubes into the two sleeve sections. Start at the BACK/SIDE and insert the frame through the nylon sleeve section.

STEP 5

Once both frame pieces have been inserted through the top and bottom sleeves, use the corner attachment to connect the front frame to the back frame.

STEP 6

Insert ground stakes through the elastic loops (2 back + 2 front) designed to help secure your goal to the ground.
