**PARTS**

**NOTE**

Blow up the rest of the product with air, either by mouth or by pump.

There are three inflation valves: one for the main unit and one for each base.

An air compressor or foot pump is recommended for inflation (not included).

**INFLATION:**

To inflate using your mouth - Unplug the air valve plug and pinch the bottom of the inflation valve to release the inner flap. A small opening will be created allowing air to flow.

To inflate using an air compressor or foot pump - Unplug the air valve plug and pinch the bottom of the inflation valve to release the inner flap. Insert the needle past the inner flap and inflate accordingly.

Once the product is inflated, close the air valve plug to keep the air inside.
