SAFETY INSTRUCTIONS

FAILURE TO FOLLOW THESE SAFETY INSTRUCTIONS MAY RESULT IN SERIOUS INJURY AND/OR PROPERTY DAMAGE AND WILL VOID WARRANTY.

Owner must ensure that all players know and follow these rules for safe operation of the system.

To ensure safety, do not attempt to assemble this system without following the instructions carefully. Check entire box and inside all packing material for parts and/or additional instruction material. Before beginning assembly, read the instructions and identify parts using the hardware identifier and parts list in this document. Proper and complete assembly, use, and supervision are essential for proper operation and to reduce the risk of accident or injury. A high probability of serious injury exists if this system is not installed, maintained and operated properly.

- 2 capable adults are recommended for this operation.
- Check base daily for leakage. Leaks will cause system to fall.
- Assemble the pole sections properly. Failure to do so could cause the pole sections to separate during play or transport.

Most injuries are caused by misuse and/or not following instructions. Use caution when using this system.

NOTE

Adjust backboard to lowest position.

While holding pole and lifting base, carefully lean system forward until wheels touch ground.

While holding pole and base, roll system to desired location.

Stand pole upright and set base flat on ground.

ALWAYS check to make sure system is stable in new location.

Place base where it will be used. Unscrew and remove base cap.

Pour sand while base is flat on the ground, and then tip forward to allow even distribution.

Repeat the action until the base is full of sand.

Once full, replace base cap.

WARNING:

For safety reasons, we recommend that sand be used instead of water to fill the base. If a leak develops, water could run out unnoticed, allowing the system to fall over, resulting in serious injuries, or property damage. If using water, check the base carefully for leaks. If a leak is found, lay the system down on the ground and call customer service. Do not use, stand up, or play on a leaking system.

MOVING THE SYSTEM

WARNING:

The system must only be moved by at least 2 adults that are capable of handling weight. DO NOT allow children to move unit.

- Adjust the system to its lowest position and lock in place to prevent the height mechanism from adjusting.
- Standing in front of the unit, pull the pole down until it is balanced on the 2 wheels.
- Move the unit to the desired location and carefully lower the unit back down.

CAUTION:

The system must only be moved when balanced on the wheels. Sliding the unit any other way may cause damage to the base and could result in sand leakage and/or system tipping over.

WARNING

FAILURE TO FOLLOW THESE WARNINGS MAY RESULT IN SERIOUS INJURY AND/OR PROPERTY DAMAGE.

Owner must ensure that all players know and follow these rules for operation of the system.

- Only hang from the rim briefly to regain balance or avoid injuring others. Release the rim as safely as possible.
- During play, especially when performing dunk type activities, keep players face away from the backboard, rim and net. Serious injuries could occur if teeth/face come in contact with backboard, rim, or net.
- Do not slide, climb, or play on base or pole.
- Completely fill base according to manufacturers instructions or the system will tip quickly causing serious personal injury.
- When adjusting height or moving system, keep hands and fingers away from moving parts.
- Do not allow children to move or adjust system.
- During play, do not wear jewelry (rings, watches, necklaces, etc.) Objects may entangle in net.
- Surface beneath the base must be smooth and free of gravel or other objects. Punctures can cause leakage and could cause system to tip over.
- Keep water and organic materials away from pole. Pole can rust and fall.
- Once a month check pole and all metal parts for rust. Completely remove rust and repaint with exterior enamel. If rust has penetrated any steel part, replace that part immediately.
- Check system before each use for proper ballast, loose hardware, instability, and signs of corrosion and repair before each use. Never play on damaged equipment.
- Do not use system during windy or severe weather. System may tip over. Place system in an area protected from the wind or in an area away from property that may be damaged if the system falls.
